

David T. Wells

Senior Full Stack Developer & Scrum Master

dave1twells@gmail.com

Professional Summary

Senior Full Stack Developer with 8+ years of experience building scalable web applications. Currently serving as Scrum Master for a 7-person development team while maintaining hands-on development responsibilities. Proven track record of database optimization (50x performance improvements), team leadership, and implementing modern development workflows including AI-assisted development practices.

Key Highlights

Full-Stack Expertise

8+ years building scalable web applications with Vue.js, PHP, and modern development practices

Performance Optimization

Expert in database performance analysis, query optimization, and strategic system improvements delivering significant performance gains

Team Leadership

Currently serving as Scrum Master for 7-person development team with proven track record in agile transformation

AI-Assisted Development

Pioneer in implementing AI-assisted workflows with GitHub Copilot and comprehensive code review processes

Professional Experience

Senior Full Stack Developer & Scrum Master

MeasuringU

Feb 2021 - Present

Lead full-stack development and serve as Scrum Master for a 7-person development team. Architect scalable solutions, conduct technical interviews, and drive agile transformation initiatives.

- Serve as Scrum Master for 7-person development team since February 2025, facilitating 2-week sprints with 30/60/90 day strategic planning
- Led complete frontend overhaul implementing Material Design methodology across entire platform
- Redesigned components, navigation, and information architecture improving user experience
- Implemented AI-assisted development workflows with comprehensive team code review processes ensuring all merged code meets quality standards

Full Stack Web Application Developer

Mountain Data Group

Feb 2020 - Feb 2021

Integrated full stack web application solutions with Mountain Data Group's primary client, showcasing client focused development and big data analytics.

- Integrated full stack web application solutions with Mountain Data Group's primary client, showcasing client focused development
- Conducted database benchmarking to track optimizations and improve query speeds, achieving significant performance improvements
- Utilized Python's data analytics libraries and statistical modeling to gain insights into census & weather datasets with over 1 billion records each
- Developed Django APIs to serve data needs quickly and securely

Python Django Data Analytics Statistical Modeling GIS Census Data Time Series Modeling Big Data Database Optimization APIs

Data Science Intern

Mountain Data Group

Apr 2019 - Feb 2020

Data science internship focused on analytics and data processing for university client projects, building foundational skills in big data and statistical analysis.

- Gained foundational experience in data analysis and processing for large-scale datasets
- Supported senior developers on data management and optimization projects with census and weather data
- Developed skills in statistical modeling and data visualization techniques for 1+ billion record datasets
- Contributed to big data solutions and time series modeling projects

Python Data Analysis Statistical Modeling Database Management Data Visualization Big Data

Web Application Developer

Colorado State University

Apr 2017 - Apr 2019

Provided programming solutions and technical support for administrators in Environmental Health, Public Health, and Risk Management departments using .NET and database technologies.

- Provided programming solutions and technical support for administrators in the Environmental Health, Public Health, and Risk Management departments
- Designed and implemented relational databases to ensure data integrity and accurate relational models
- Acted as the lead developer for select .NET data-driven solutions, including tracking university drones, logging public health complaints, and performing risk management assessments for international travel
- Worked directly with clients to develop custom pages and tools addressing specific administrative needs

About

Transitioned from sociology to computer science, bringing a unique perspective on user experience and team dynamics. Passionate about creating technology that genuinely improves people's lives and building collaborative development environments.

Philosophy: I believe the best software solutions come from understanding both the technical requirements and the human needs behind them. My background in sociology gives me insight into user behavior and team communication that enhances my technical work.
